EDUCATION

- **PDPM Indian Institute of Information Technology, Design and Manufacturing** Jabalpur(M.P.)
Bachelor of Technology in Electronics and Communication Engineering; CPI: 8.1 Aug 2023-Present
Courses: Data Structures and Algorithms

SKILLS SUMMARY

- **Languages:** C++, Python, HTML, CSS, Typescript, JavaScript
- **Frameworks/Libraries:** React.js, Express.js, Node.js, Redux
- **Databases:** MongoDB, MySQL
- **Developer Tools:** Git, GitHub, Docker, Postman
- **Platforms/Services:** Cloudinary, ImageKit, Clerk, Inngest, Nodemailer
- **Core Areas:** Data Structures and Algorithms, Backend Development, REST APIs, Event-Driven Systems
- **Relevant Coursework:** Computer Networking, Object-Oriented Programming (OOP), Operating Systems, DBMS
- **Soft Skills:** Teamwork, Problem Solving, Leadership, Adaptability, Time Management, Quick Learning

PROJECTS

- **PingUp - Connect with the world (GitHub Repository) (Website)**
Tech Stack: React.js, React Router DOM, Redux, Express.js, Node.js, MongoDB, Multer
 - Developed a full-stack social networking platform with user profiles, follow functionality, and personalized discovery.
 - Implemented **real-time private messaging** using **Server-Sent Events (SSE)**, supporting 1-to-1 chats with instant delivery and read status
 - Designed an **event-driven architecture** using Inngest to synchronize authentication events and application data across services.
 - Integrated an **LLM-powered** chat assistant that generates context-aware reply suggestions using prompt engineering and conversation context.**Tools/Services:** Postman, Inngest, Clerk, ImageKit, Nodemailer, Server Sent Events(SSE)
- **Tomato - Food Delivery Website (GitHub Repository)**
Tech Stack: React.js, Express.js, Node.js, MongoDB, JavaScript, JWT, bcrypt, Stripe
 - Developed a full-stack food delivery platform with authentication, cart management, and secure online payments.
 - Designed **RESTful backend APIs** for user management, food catalog, and order tracking.
 - Implemented role-based access control for customers and restaurant administrators.
 - Integrated **Stripe API** for secure payment processing and automated order workflows.
- **Video Tube Backend (GitHub Repository)**
Tech Stack: Express.js, Node.js, MongoDB, JavaScript, JWT, bcrypt
 - Designed a YouTube-style **video hosting backend** with 10+ core features including login, sign-up, logout, video upload, likes/dislikes, comments, replies, and subscriptions
 - Engineered backend using **Node.js, Express.js, MongoDB, Mongoose**, with secure authentication via **JWT, bcrypt, and token-based session handling**.
 - Implemented access and refresh tokens, along with **security password hashing** following industry-standard authentication and security best practices
 - Ensured robust user-interaction support through 3+ features such as comment threads, video engagement (likes/dislikes), and subscription management.

CODING PROFILES

- LeetCode: **Knight, 750+ problems** solved, 127 days streak maximum
- CodeChef: **3-star** rating, 250+ problems solved
- CodeForces: **Pupil** rank, 250+ problems done

ACHIEVEMENTS

- Secured **3rd position** in Roborush 2.0 organized by Electronics and Robotics Society IIITDMJ

VOLUNTEER

- Led social media strategy and community engagement as Core Member at **Jagrati IIITDMJ**, supporting educational programs for 100+ underprivileged children daily.
