EDUCATION

- **PDPM Indian Institute of Information Technology, Design and Manufacturing** Jabalpur(M.P.)
Bachelor of Technology in Electronics and Communication Engineering; CPI: 8.1 Aug 2023-Present
Courses: Data Structures and Algorithms

SKILLS SUMMARY

- **Languages:** C++, Python, HTML, CSS, JavaScript
- **Frameworks:** React.js, Express.js, Node.js
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Tools and Technologies:** Cloudinary, Postman, Git, GitHub, Inngest, Clerk, ImageKit, NodeMailer
- **Core Competencies:** Data Structures and Algorithms, Competitive Programming, Web Development
- **Soft Skills:** Leadership, Event Management, Public Speaking, Task Prioritization
- **Relevant Coursework:** Computer Networking, Object-Oriented Programming (OOP), Operating Systems, DBMS

PROJECTS

- **PingUp - Connect with the world (GitHub Repository) (Website)**
 - Developed a full-stack social networking platform with **user profiles, follow functionality, and personalized discovery**.
 - Implemented **real-time private messaging** using **Server-Sent Events (SSE)**, supporting 1-to-1 chats with instant delivery and read status
 - Architected an event-driven workflow to reliably **sync user creation, updates, and deletions** across authentication and application layers.
 - Integrated an **AI-powered chat suggestions** feature that generates context-aware reply recommendations
 - **Tech Stack:** React.js, React Router DOM, React Redux, Express.js, NodeJS, MongoDB, JavaScript, Multer
 - **Tools/Services:** Postman, Inngest, Clerk, ImageKit, Nodemailer, Server Sent Events(SSE)
- **Tomato - Food Delivery Website (GitHub Repository)**
 - Built a **responsive food delivery platform** including customer registration, food browsing, cart management, online payments, and fully automated order processing.
 - Integrated **user authentication** and role-based access control for two roles: customers and restaurant admins
 - Integrated **Stripe API** to enable secure online payments, supporting multiple payment methods and automating the entire order processing workflow
 - Developed **RESTful APIs** for food items, user management, and real-time order tracking.
 - **Tech Stack:** React, React Router DOM, Express.js, NodeJS, MongoDB, JavaScript, jwt, bcrypt, Stripe, Multer
 - **Tools:** Postman, VS Code
- **Video Tube Backend (GitHub Repository)**
 - Designed a YouTube-style **video hosting backend** with 10+ core features including login, sign-up, logout, video upload, likes/dislikes, comments, replies, and subscriptions
 - Engineered backend using **Node.js, Express.js, MongoDB, Mongoose**, with secure authentication via **JWT, bcrypt, and token-based session handling**.
 - Implemented access and refresh tokens, along with **security password hashing** following industry-standard authentication and security best practices
 - Ensured robust user-interaction support through 3+ features such as comment threads, video engagement (likes/dislikes), and subscription management.
 - **Tech Stack:** Express.js, NodeJS, MongoDB, JavaScript, jwt, bcrypt
 - **Tools:** Cloudinary, Postman, VS Code

CODING PROFILES

- LeetCode: **Knight, 600+ problems** solved, 127 days streak maximum
- CodeChef: **3-star** rating, 250+ problems solved
- CodeForces: **Pupil** rank, 240+ problems done

ACHIEVEMENTS

- Secured **3rd position** in Roborush 2.0 organized by Electronics and Robotics Society IIITDMJ

VOLUNTEER

- Led social media strategy and community engagement as Core Member at **Jagrati IITDMJ**, supporting educational programs for 100+ underprivileged children daily.
